

Arlin Mfg. and its subsidiary Trico Specialty Films, are proud to announce that we have been awarded ISO 9001:2015 certification. This is an internationally recognized standard that helps to ensure that our products meet the needs of our customers through an effective quality management system or QMS. It is the most widely used QMS standard in the world, with over 1.1 million certificates issued to organizations in 178 countries.

Our decision to work toward ISO 9001 registration demonstrates our commitment to provide high-quality and consistent film and sheet products to our customers and our ongoing commitment to continually improve our processes. To become ISO 9001:2015 certified, Arlin/TSF underwent an evaluation process that included quality management system development, a management system documentation review, pre-audit assessment and a final multi-day audit by an ISO accredited registrar.

ISO 9001 provides a framework and set of principles that ensure a common-sense approach to the management of our organization to consistently satisfy customers and other stakeholders. By applying the principals of the “Process Approach” and “Risk-Based Thinking” to our processes we are in an enhanced position to deliver exceptional products and customer service time after time.

The achievement of this certification further validates our commitment to our customers as stated in our quality policy:

“Arlin/TSF’s goal is to consistently provide our customers with high-value, quality products, and exceptional customer service. We strive for 100% product acceptance and zero defects. To achieve this, we are committed to comply with customer requirements, environmental regulations, and to continually improve the effectiveness of our quality management system.”
